LICENSE AND EDUCATION

Geodetic Engineer Licensure Examination, Board Passer September 2026

University of the Philippines Diliman, Quezon City Graduated July 2026

BS Geodetic Engineering, Cum Laude

FIELD SURVEYING PROJECTS

Academic field projects, BS Geodetic Engineering, University of the Philippines Diliman

- **Property (Cadastral) Survey, Lot 41-C-3-A-19:** Relocated and consolidated six parcels (Lots 6068 A to F) and subdivided a 26,835 sq.m. property; verified boundary monuments through common point analysis tied to BLLM 1; staked out corners by total station within 10 cm tolerance per DAO 1998-12 and DMC 2007-29
- **GNSS Network and Kinematic Survey:** Observed a closed 6-triangle network using Trimble SPS985 and u-blox ZED-F9P; processed to RINEX in RTKLIB with 31.405 ppm misclosure (3rd-order, under 50 ppm); mapped Academic Oval centerline and Sunken Garden topography
- **Geodetic Control Survey:** Ran a 7-point closed-loop traverse at UP Diliman with 1:27,751 REC, exceeding the 1:20,000 3rd-order requirement; applied least squares adjustment to 0.000001 convergence
- **Instrument Calibration:** Calibrated Nikon and Sokkia total stations on 25 to 100 m baselines, achieving 99.9968% relative accuracy
- **Hydrographic Survey:** Bathymetric survey of UP Lagoon (1:21,037 REC) modeled in QGIS
- **Differential Leveling:** Completed double set-up, three-wire leveling circuits to 2 mm closure (2nd-order); computed the reciprocal leveling C-factor (0.1795) to remove curvature and refraction errors
- **Road As-Built Survey:** Ran a 1:17,918 REC traverse and produced planimetric, profile, and cross-section CAD plans
- **Route Design and Earthwork (Roces St.):** Designed a 750 m road alignment at 120 kph in Civil 3D; computed cut and fill from 20 m cross-sections and balanced earthwork with mass haul diagrams

EXPERIENCE

Geospectrum Marketing Services, Remote Sensing/GIS Intern June 2025 to July 2025

- Performed remote sensing image processing and web GIS development tasks, including map configuration and spatial data integration
- Coordinated deliverables within a professional team environment using project management principles

LEADERSHIP

UP Society of Geodetic Engineering Majors (UP GEOP) Member 2023 to 2026

- Academic Deputy, 1st Semester AY 2025 to 2026: coordinated with faculty and the student body on academic affairs and initiatives

SKILLS

- **Survey Equipment:** Total station (Nikon, Sokkia), GNSS (Trimble SPS985, u-blox ZED-F9P), differential leveling
- **Survey Work:** Cadastral, geodetic control, topographic, hydrographic, route, construction, and as-built surveying; traverse computation and least squares adjustment
- **Software:** AutoCAD, Civil 3D, RTKLIB, QGIS, ArcGIS, Python
